## ST. JOSEPH'S UNIVERSITY, BENGALURU- 27 M.Sc MATHEMATICS- III SEMESTER SEMESTER EXAMINATION: OCTOBER 2023 (Examination conducted in November/December 2023) **MT 9222: CLASSICAL AND CONTINUUM MECHANICS**

(For current batch students only)

## Time: 2 hr

Max. Marks: 50

The paper contains TWO printed pages.

## Answer any FIVE full questions of the following:

| 1. Obtain the expression for the following:                                  |            |
|--|------------|
| (a) Acceleration in a plane polar co-ordinate system.                        | [4 marks]  |
| (b) Coriolis force.  | [6 marks]  |
|  |            |
| 2. Derive the following:   |            |
| (a) Lagrangian form of D'Alembert's principle.                               | [3 marks]  |
| (b) Generalized momentum of system of particles.                             | [2 marks]  |
| (c) Hamiltonian principle for non-holonomic constraints.                     | [5 marks]  |
|  |            |
| 3. Derive the expression for principle of least action.                      | [10 marks] |
| (OR)   |            |
| (a) State and prove $\epsilon - \delta$ identity.                            | [4 marks]  |
| (b) Show that $\nabla^2(x_m x_n) = 2\delta_{mn}$ .                           | [2 marks]  |
| (c) Derive curl of a vector field.   | [4 marks]  |
|  |            |
| 4. (a) State and prove divergence theorem of a tensor.                       | [5 marks]  |
| (b) Find F and $F^{-1}$ for the deformation defined as:                      |            |
| $x_1 = x_1^0 - x_2^0 x_3^0, \ \ x_2 = x_2^0 + x_1^0 x_3^0, \ \ x_3 = x_3^0.$ | [5 marks]  |

| 5.       | . (a) Prove the following:   |           |
|----------|--|-----------|
|          | (i) $J = 1 + e_{kk}$ for a small deformation.  | [3 marks] |
|          | (ii) $e_{kk}$ is a dilation.   | [2 marks] |
|          | (b) Find the velocity and acceleration for a continuum rotates like rigid bo           | dy with   |
|          | angular velocity $\vec{\omega}$ about $x_3$ axis.                                      | [5 marks] |
|          |  |           |
| 6.       | . (a) Find the stream lines and path lines for the motion determined by:               |           |
|          | $v_1 = 1 + at$ , $v_2 = x_1$ , $v_3 = 0$ , where a is a constant.                      | [5 marks] |
|          | (b) State and prove Kelvin's circulation theorem.                                      | [5 marks] |
|          |  |           |
| 7        | (a) For a given velocity field $v_i = \frac{x_i}{1-x_i}$ show that $a = a_0(1+t)^{-3}$ | [4 marks] |
| <i>.</i> | . (a) For a given velocity field $v_i = \frac{1}{1+t}$ , show that $p = p_0(1+t)$ .    |           |
|          |  |           |

(b) Derive the expression of balance of energy. [6 marks]
